Mountain Weather Forecast

Northwest Highlands

Including Sutherland, Ben Wyvis, Wester Ross, The Cuillin, Glen Affric, Glen Shiel and Knoydart
Forecast valid from 06:00 on Tuesday 09 May 2023 until 23:59 on Wednesday 10 May 2023

Forecast Issued on Tuesday 09 May 2023 at 03:56 by Met Office Aberdeen

Confidence: High confidence for a showery outlook for the next few days. Lower confidence for when heavier showers will occur and for the frequency for particular ranges. Mainly light winds for the forecast period too.

Headline for Tuesday 09 May 2023: A cloudy morning with some mist and fog, frequent afternoon showers.

Precipitation probability					
20%	50%	50%	50%	50%	40%

Forecast for Tuesday 09 May 2023

Weather: Mist and fog will linger and be slow to clear after dawn. The morning will brighten up with some bright or sunny spells for most ranges, perhaps remaining cloud for more eastern hills around Ben Wyvis. Frequent showers will develop, these will be quite short lived but they may group together with cloud gathering too. Showers dying out in the evening with some clear spells developing. Feeling quite warm in any sunny spells in the milder air.

Chance of cloud-free hill tops above 800m: 70% improving to 90%, perhaps patchy low cloud in showers

Low cloud and visibility: Early low cloud with scattered amounts above 500m, this will lift and clear gradually after dawn, with cloud free summits expected for much of the day, perhaps patchy cloud falling below the higher Torridon tops in afternoon showers briefly. Visibility may be poor in mist early in the day and very poor in any early fog patches but expected to improve at all levels in the morning becoming mainly very good with views all around, dipping temporarily in any sharp showers.

Met Office Aberdeen Meteorologist's View
A pleasant enough day but worth keeping the waterproofs handy, pleasantly warm in brighter spells and light winds.

Forecast for Wednesday 10 May 2023
Weather: A bright and dry start to the day although some mist and fog initially but becoming showery, most showers will be short lived but more intense afternoon showers are possible with some hail and thunder mixed in.

Maximum wind: Southerly 10-15mph

Chance of cloud-free hill tops above 800m: 80%, cloud lowering in heavier showers.

Low cloud and visibility: Patchy or scattered cloud above 600m at times in heavier showers. Good visibility but dipping moderate or poor in showers.

Temperature: **Glens:** Plus 6 rising to 15 Celsius.
At 800m: Plus 3 rising to 8 Celsius.
Freezing level: Above all summits.
